Experience

10/15 - Now Software Engineer

The HUT Group, Northwich, UK

React-Redux Webpack Development: Pushing the team to use React-Redux and Webpack for production. I develop components using **React**, manage states using **Redux** and bundle up using **Webpack 3.0**. In addition, I implement **Eslint** and **Gitbook** to make sure all the code committed by the team meet my high standard.

Front End Development: Developing new component using latest best Front End technologies and practice. By developing **styleguide** follow by the implementation using plain vanilla JavaScript, **BEM** and **SASS**, I am able to deliver responsive and highly reusable components. In addition, I am also involved in replacing JQuery and legacy JS features with **ES6** to improve the performance of the sites.

Testing: Developing new End User test cases to run on SauceLabs and real devices, improve our Unit/Integration Test coverage.

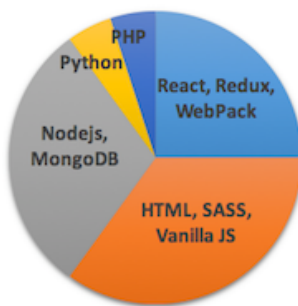

09/12 - 10/13 Software Test Developer

Broadcom Ltd, Blacknell, UK

Live network testing system: I was responsible for maintaining all the existing test scripts. adding new features and designing new test scenarios in 2G/3G/4G using main shell scripting language.

Automation testing tools/wireless communication testers: I worked with these test boxes to carry out network tests. Phone calibration was also developed and maintained by me.

Programming

Notable Projects

05/16 - 08/16 Referrals Scheme

The HUT Group

The referrals scheme is used for existing customers of the sites to refer their friends or family to register new accounts and place the orders. Both referrer and referee will get credits. The referrers can share their referrals link or code using various sharing channels such as Facebook, Twitter, WhatsApp,... As the technical lead in the project I make sure that the business is involved in every sprint for feedbacks and all the development work is completed in the high standard. The project generate more than **2 millions pounds** in revenue and bring more than **40000 new customers**.

Unix ★★★★★

12/15 - 03/16 E2E Automation

The HUT Group

The mobile traffic is more than 50% of the traffic in the web today. This creates the challenge in mobile function assurance at the HUT. Foreseeing the problem, I proposed the mobile testing project to the business. Finally, I researched and developed the **End User testing webapp** using Nodejs, Aappium, WebdriverIO and Selenium. The app is used widely at the company to test websites on the real devices on both iOS and Android.

Awards

- 09/2011 **Full Term Scholarship** [Vietnam National University, Vietnam](#)

Interest

In my free time, I like to catch up with the latest web technologies and trends from SmashingMagazine and EchoJS. I am passionate about travelling too. New countries, cuisine, people and cultures are always of interest to me. That's why I have been to 20 countries. Finally, I believe that our brain and body need to exercise equally, so I always keep myself active by doing outdoor hiking, running and yoga.
